I will be making available some cut ready black and white images.

You will Upload images of willow leaves, iris, and caladium leaves.

I will have a link to these images. You will need to right click on these images and save them in your Download Folder. Note the name of the image and the name of the folder in which you are saving it so you can find it.

Use your own images: Find images with good contrast, simple lines and uncomplicated backgrounds. Scan some leaves in your printer/scanner.

Check out these videos and websites ahead of time if you wish. If it's all Greek to you and you want to just wait until class, that's OK, too.
